Research Scientist - AI For Good

ivan@ivanbrugere.com |  ivanbrugere

Current Objective

I am currently seeking AI research scientist positions in industry, available May 2020.

I am an AI Research Scientist focusing on high-impact applications for social good. I have a deep interest in sustainability and earth science, computational social sciences, and graphs/networks. My most recent interests have been in fairness and bias, particularly within complex, graph-structured data. My PhD research focused on data science methodologies for inferring and validating graphs constructed from underlying data, with applications in interdisciplinary computational ecology, mobile location privacy, and large-scale multimedia recommendation.
